

You are invited to an informal

Soil Pit & Workshop Session

to be held at

Bungeet (10am) and Miepoll (2pm)

Tuesday 6 February, 2018

The soil pits are located at the sites of the on-farm weather stations and soil moisture probes installed in 2017 as part of the project, *Improving fertiliser and chemical use through local, real time weather and soil information for farmers of the productive plains.*

The soil pits will provide an opportunity to look at the soil moisture results from the probes, soil test results from 2017, the impact of soil type on water movement, and where the N went last season.

Program:

10 am: Bungeet Soil pit & workshop (informal discussion around soil pit)

Site is opposite the house at 320 Devenish-Wangaratta Road (on north side of road), Bungeet West.

2 pm: Miepoll Soil pit and workshop (informal discussion around soil pit)

Site is on Carter's Road, Miepoll (dirt road), which is located between Arcadia Two Chain Road and the Euroa-Shepparton Road.

The sessions will be presented by Dr Cassandra Scheffe, Riverine Plains Inc.

This event is free to attend and all are welcome. Signage provided on the day.

To register, or for further information, please contact Cassandra Scheffe at Riverine Plains on 03 5744 1713, 0419 238 798 or cassandra@riverineplains.org.au

This project event is supported by the Goulburn Broken CMA through funding from the Australian Government's National Landcare Program
