

Riverine Research Centre Field Day 2019

Your invitation to view and discuss the range of local research

When: Tuesday 24 September 2019
9.00am - 12noon

Where: Riverine Research Centre
277 Reillys Road Yarrawonga, Victoria (see map overleaf)

During 2019, the Riverine Research Centre trials focus on the performance of cereals sown from mid-March to early May. There are 27 cereal varieties ranging from spring wheat and barley through to early-sown dual-purpose winter wheat.

Other trials at the RRC include; managing early sown longer-season cereals, the effects of grazing, sowing rate and nitrogen timing on early sown wheat, nutrition and disease management and observations on aphid numbers in the region.

Discussions and demonstrations include:

- **GRDC Management of early sown wheat trials:** Outline of major findings from 3 years of work on longer season wheats sown early in the mid-low rainfall zone. *Kenton Porker, South Australia Research and Development Institute (SARDI) and Michael Straight, FAR Australia.*
- **Innovations in barley: Dual purpose and longer-season barley focus:** early-sown winter barley and management of new and novel varieties. *Kenton Porker, SARDI.*
- **Early sown winter wheats in the Riverine Plains Region:** An update on Riverine Plains Inc trials evaluating the local adaptation of winter wheat varieties, with yield results available 7 days after harvest. *Ian Trevethan, Riverine Plains Inc and Michael Straight, FAR Australia.*
- **Disease Resistance Update:** An update on new-found resistance to SDHI fungicides and new work on the disease Ramularia Leaf Spot in barley. *Kat Fuhrmann, FAR Australia*
- **Agronomic Panel Discussion :** Addressing the current seasonal issues.

The Riverine Research Centre is a partnership between Riverine Plains Inc and FAR Australia.

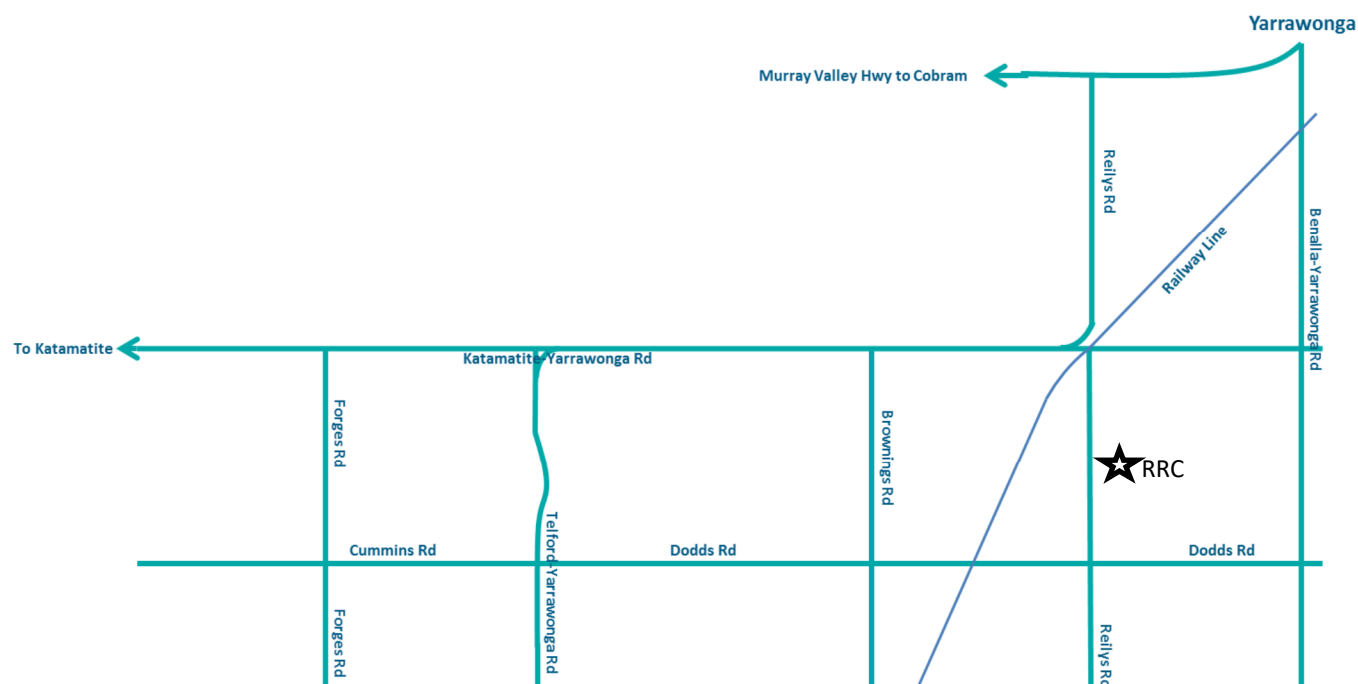

Morning tea and lunch provided.

To RSVP or for further information
