

Riverine Plains Inc invites you to a

Cover & Intercropping Virtual Field Day

Date: Tuesday 8 September, 2020

Time: 9am – 9:30am

How: Online via Zoom. To register, click on the link below or click 'Register Now'

https://us02web.zoom.us/meeting/register/tZAvduGtpzgiEtXezkN56kYgTiHr8V-mJTlu

Riverine Plains Inc has established a long-term trial site at Burramine, Victoria, to assess the viability of integrating diverse species into the farming system, as either winter rotation crops, green/brown manures or summer cover crops, and how these crops can affect soil performance and increase farm profitability.

Join us as we take a virtual tour through the site and discuss previous season results

Speakers include;

- Jane McInnes (Riverine Plains Inc)
- Dr Cassandra Schefe (AgriSci): Increasing diversity in cropping systems, site and project overview
- Professor Terry Rose (Southern Cross University): Results from 2019
- Nathan Lawless (Burramine): Benefits to farmers
- Brendan Christy (Agriculture Victoria): Intercropping to exploit rainfall for profit trial (also sown at the site)

After registering, you will receive a confirmation email with information about joining the meeting.

For more information, please contact Jane McInnes at the Riverine Plains office on 03 5744 1713 or email: jane@riverineplains.org.au

This trial is part of the Plant-based solutions to improve soil performance through rhizosphere modification project, supported by the Cooperative Research Centre for High Performance Soils (Soil CRC) and led by Southern Cross University. This project is supported by the Goulburn Broken Catchment Management Authority's 'From the Ground Up' program through funding from the Australian Government's National Landcare Program.

The Intercropping to exploit rainfall for profit trial is funded by the Victorian Grains Innovation Partnership with Agriculture Victoria and the Grains Research and Development Corporation.
